

Experiment -2

Design of Logo using GIMP.

Step – 1:

Open GIMP

Go to file -> New file -> Click OK.

Step – 2:

Go to Images -> Guides -> And select vertical and horizontal guide with 50 %.

Step – 3:

Using the shape select tool (ellipse and rectange) start selecting the border/boundaries of the shape (using CTRL+Shift).

Step – 4:

Create a new layer to erase the intersection of square and circle so as to give an effect of overlapping.

Step – 5:

Select Paintbrush tool from the toolbar and a colour from colour palette.

Step – 6:

Create a new layer to add text of the center of the design and align it using align tool.

Step – 7:

Save the output and export it as xcf file.
